Back to the Stone Age

By EDGAR RICE BURROUGHS

When the great dirigible, the giant 0-220, sailed majestically through the north polar opening out of that weird and savage inner world, Pellucidar, it left behind, unaccounted for, but a single member of its original crew that had sailed with Jason Gridley and Tarzan to the rescue of David Innes.

That man was Lieutenant von Horst, and this is the story of the strange adventures that befell him among the stone age peoples of Pellucidar as he wandered, friendless and alone, from one danger to another — a thrilling story in which a barbarian slave girl, savage cave men, prehistoric reptiles and mammoth animals all have their exciting roles.
